

Calflora Weed Manager (WM) subscription as of January 1, 2017

Annual subscription:

\$2,400 per agency per year

A Weed Manager subscription includes one Weed Manager group, one form for that group, and support* for all members of that group. The year begins the day the agency subscribes and the subscription may be renewed on that day the following year.

Potential additional fees:

Groups

One Weed Manager (WM) group is included in a subscription. This WM group includes 10 users within the agency; for more than 10 users within that agency, there is a \$500 fee. This \$500 fee for additional users will be waived if the agency contributes to WM development** in 2017.

Map caches

\$900 for the first 3 caches, \$250 each after that. Each cache may cover up to 1500 acres to zoom level 18, or more acres for lower zoom levels (due to phone constraints).

Form changes

\$125/hour (initial form for a group is included in annual fee). Form change fees after initial set-up are waived if the agency contributes to WM development** in 2017.

Customized Reports

May exist already, or approximately \$2,500 per new report type

*Support includes contacting Calflora via phone, email, or in person with questions about Weed Manager. These may be related but are not limited to questions about [Group Observations](#) exports or search filters, data imports, [shape editor](#), setting up [projects within a group](#), [organization options](#), [group members](#), [work session entries](#), [survey entry](#), [Hour and Herbicide Distributor](#), or [reports](#).

**WM development includes building out the current WM platform to include additional or improved functionality.
